## Ö N S Ö Z

**Bu yıllık, Sağlık Propagandası ve Tıbbî İstatistik Genel Müdürlüğünce daha önceden seri olarak yayımlanan Türkiye Sağlık İstatistik Yıllıklarının bir devamı olup 1975 - 1978 yıllarını kapsamaktadır.**

**Yurdumuzda mevcut tüm sağlık kurum ve kuruluşlarından derlenerek yayımlanan bu istatistiki yıllıkların amacı, koruyucu ve tedavi edici sağlık ihzmetlerinin ülke çapındaki durumunu yansıtmak ve çeşitli kademelerde hizmetlerin yürütülmesi ile ilgili sağlık plan ve programlarının hazırlanmasında yardımcı olmaktır.**

**Bu yıllıkta, diğer yıllıklardan farklı olarak, hastane istatistiklerine daha ayrıntılı ve detaylı yer verilmiştir.**

**Türkçe ve İngilizce olarak Dairemizce hazırlanan bu yıllıkta, başta Sağlık ve Sosyal Yardım Bakanlığı olmak üzere diğer bakanlıklar ve resmî kuruluşlar, Üniversiteler, belediyeler ve özel kişilere ait sağlıkla ilgili kuruluşların çalışmalarına yer verilmiştir. Ayrıca Devlet İstatistik Enstitüsünce derlenen ve yayınlanan nüfus ve ölüm istatistiklerinden de bazı tablolar alınmıştır.**

**Bu yıllıktaki istatistiki verilerin derlenmesinde katkıda bulunan Bakanlığımız merkez ve taşra örgütleri ile Bakanlığımız dışındaki kuruluşlara teşekkürlerimizi sunmayı görev bilmekteyiz.**

## F O R E W O R D

This year-book, is the continuation of the Health Statistics Year-Books of Turkey which were published in a series formerly by the General - Directorate of Health Education and Medical Statistics and covers the years of 1975 - 1978.

The aim of these statistical yearbooks issued as collected by all health organizations and establishments present in Turkey, is to reflect the countrywide situation of both the preventive and therapeutic health services and also assist in the arrangement of health plans and programmes concerned with the running of services at different levels.

In this yearbook as different from others, more and detailed information about hospital statistics were given.

In this yearbook prepared by our Department both in Turkish and English, information concerning mainly the activities of the Ministry of Health and Social Assistance as well, the health service activities of other ministries and official establishments, Universities, municipalities and private establishments concerned with health, is included. Also some statistical tables concerning population and mortality statistics collected and published by the State Institute of Statistics have been added to the Yearbook.

On this occasion we feel it duty to express our gratitute to the members of the central and provincial organizations of our Ministry and other organizations outside our Ministry for the assistance contributed in compiling the statistical data mentioned in this Yearbook.

Directorate - General
of
Health Education and
Medical Statistics

## GİRİŞ

1961 tarihli Türkiye Cumhuriyeti Anayasası Devletin, herkesin beden ve ruh sağlığı içinde yaşayabilmesi ve tıbbî bakım görmesini sağlamakla ödevli olduğunu hükme bağlamıştır. Devlet, Anayasanın kendisine verdiği bu görevi Sağlık ve Sosyal Yardım Bakanlığı kanalı ile yürütmektedir. Anılan bu Bakanlıktan başka diğer bazı Bakanlıklar, iktisadî devlet kuruluşları, Sosyal Sigortalar Kurumu, tıp fakülteleri, belediyeler, özel kuruluşlar da çıkarılan çeşitli yasalarla sağlık hizmetlerine katkıda bulunmaktadır.

Sağlık ve Sosyal Yardım Bakanlığı «Sıhhiye ve Muaveneti İctimâiye Vekâleti» adı altında 1920'de Ankara'da Büyük Millet Meclisi Hükümeti kurulduğunda çıkarılan 2/5/1920 gün ve 3 sayılı yasa ile kurulmuştur. Bakanlık başlangıçta Bakan, Müsteşar, Hıfzıssıhha ve Sicil Daireleri, Muhasebe ve Evrak Kalemi ile bir kaç müfettişten ibaretti.

Bakanlık bugünkü merkez ve taşra örgütü temel yapısını 23/6/1936 tarihinde kabul edilen 3017 sayılı «Sağlık ve Sosyal Yardım Bakanlığı Teşkilâtı ve Memurin Kanunu» ile kavuşmuş ve anılan tarihden günümüze kadar da bu konuda çıkarılan yasalarla bu yapı genişletilmiştir.

Sağlık ve Sosyal Yardım Bakanlığının görev, yetki ve sorumlulukları bazı temel yasalarla belirlenmiştir. Bu yasaların en önemlileri; 1928 tarih ve 1219 sayılı Tababet ve Şuabatı San'atlarının Târzı İcrasına Dair Kanun, 1930 tarih ve 1593 sayılı Umumî Hıfzıssıhha Kanunu ile 1961 tarih ve 224 sayılı Sağlık Hizmetlerinin Sosyalleştirilmesi Hakkında Kanun'dur.

1593 sayılı Umumî Hıfzıssıhha Kanunu; memleketin sağlık koşullarını düzeltmek ve toplumun sağlığına zarar veren bütün hastalıklar ve diğer zararlı etkenlerle savaşmayı, gelecek kuşakların sağlıklı olarak yetişmesini sağlamayı ve halka tıbbî ve sosyal yardım yapmayı Devletin genel hizmetlerinden saymakta ve Millî Savunma Bakanlığı Örgütü dışında kalan tüm kuruluşlara ait sağlık hizmetlerinin denetimini de Sağlık ve Sosyal Yardım Bakanlığına bırakmaktadır.

## INTRODUCTION

The Constitution of the Republic of Turkey dated 1961 has assigned the State with the responsibility of securing means for every one to live physically and mentally a healthy life and to receive medical care. The State executes this duty assigned to it by the Constitution, through the Ministry of Health and Social Assistance. Besides the Ministry of Health other Ministries, Economic State Enterprises, the Social Insurance Foundation, Schools of Medicine, municipalities and private establishments in accordance with various law issued for this purpose contribute to carrying out some health services.

The Ministry of Health and Social Assistance was founded with law No. 3 dated 2/5/1920 and issued by the government of the Grand National Assembly that was formed in Ankara in 1920. At the begining, the Ministry consisted of the Minister, the Under-Secretary of State, Directorate of Hygiene and Directorate of Personnel for Registration, Directorate of Accounting, Record-Office and a few inspectors.

The Ministry's central and provincial basic structure at present, was secured by the Law numbered 3017 pertaining to the «Organization and Civil Servants of the Ministry of Health and Social Assistance» wihch was passed on 23/6/1936 and thus its organization was expanded to meet the growing needs with the laws passed for this purpose begining from its mentioned date up to this time.

The duties, authority and responsibilities of the Ministry of Health and Social Assistance has been determined by some main laws. The most important of these are : The Law No. 1219 dated 1928, For Medicine and Execution of the Art of Medicine; the Law No. 1593 dated 1930, Public Health; and the Law No. 224 dated 1961, For the Socialization of Health Services.

With the Public Health Law No : 1593, improvement of the health circumstances of the country, control of all diseases and other harmful factors endangering the health of the people, securing the healthy growth of the coming generations and providing both medical and social assistance to the public are considered among the general services of the State. Also, the Ministry of Health and Social Assistance is assigned with the execution, excluding health activities of the Ministry of Defence, of controlling the health services of all the organizations.

Bu yasanın 3 üncü maddesi Bakanlığın görevlerini şöyle belirlemektedir.

1. Doğumları artırmak (1965 yılında çıkarılan 557 sayılı Nüfus Planlaması Kanunu ile bu hüküm kaldırılmıştır.) kolaylaştırmak ve çocuk ölümünü azaltacak önlemleri almak;

2. Annelerin doğum öncesi ve sonrası sağlıklarını korumak;

3. Yurda bulaşıcı ve salgın hastalıkların girmesine engel olmak;

4. Yurt içinde her türlü bulaşıcı ve salgın hastalıklarla veya çok sayıda ölüme neden olduğu görülen diğer zararlı etkenlerle mücadele etmek;

5. Tıp ve şubeleri san'atlarının yürütülmesi ile ilgilenmek;

6. Gıdalar ile ilâçları ve bütün zehirli, etkili ve uyuşturucu maddelerle yalnız hayvanlar için serumlar ve aşılar hariç olmak üzere her çeşit serum ve aşıları denetlemek;

7. Çocuklarla gençlerin sağlıklarının korunmasına ait işlerle çocuk sağlık ve bünyesinin korunması ve geliştirilmesine ait kuruluşları denetlemek;

8. Okul sağlığı hizmetlerini yürütmek;

9. Çalışma ve meslek sağlığı ile ilgili hizmetleri yürütmek;

10. Maden suları ile şifa verici diğer suları sağlık yönünden kontrol etmek;

11. Hıfzıssıhha kurumları ve bakteriyoloji laboratuvarları ile genel olarak hayati muayene ve analizlere ait kuruluşların açılış ve idareleri ile ilgili hizmetleri yürütmek;

12. Mesleki öğretim kuruluşları açmak, idare etmek ve dengi kuruluşları denetlemek;

13. Ruh ve sinir hastalıkları ile ilgili tedavi kurumları ile sakatları kabul edecek yurt ve kuruluşlar kurmak ve idare etmek;

14. Göçmenlerin sağlık işleri ile ilgilenmek;

15. Hapishanelerin sağlık durumu ile ilgilenmek;

16. Tıbbî istatistik düzenlemek ve derlemek;

17. Sağlık yayınları yayımlamak ve sağlık eğitimi yapmak;

18. Taşıt araçlarının sağlık durumu ile ilgilenmek.

Article 3 of the same Law lists the services to be directly executed by the Ministry as follows :

1. To increase and facilitate births (This paragraph is no more valid with the coming into force in 1965 of the Population Planning Law No : 557.) and take precautions against child deaths;

2. To protect the prenatal and postnatal health of mother;

3. To take necessary measures for the prevention of infectious and epidemic diseases from entering the country;

4. To care for control within the country all kinds of contagious and epidemic diseases of harmful factors seen to have caused a large number of deaths;

5. To take interest in the pratice of medicine and allied professions:

6. To control food articles, drugs and all poisonous, highly effective and narcotic material excepting sera and vaccinations used for animals, all kinds of sera and vaccines;

7. To control activities pertaining to the protection of the health of the children and the youth and the establishments for the protection and improvement of children's health and physique;

8. To carry-out the School health services;

9. To carry-out the Labour and professional health activities;

10. To control mineral and other similar waters with healing properties from the view point of health;

11. To carry out the services concerned with the establishment and administration of the hygienic institutions, bacteriological laboratories and in general, biological institutions and analysis centres;

12. To establish and administrate vocational training institution and control the similar establishments;

13. To establish and administrate treatment institutions for mental and nervous diseases and nursing homes and establishments for those who are disabled;

14. To provide health services for immigrants;

15. To supervise the health conditions of prisons;

16. To arrange and collect medical statistics;

17. To issue pulications concerning health and conduct health education;

18. To be concerned with the health condition of vehicles.

## NÜFUS

Türkiye'de genel nüfus sayımları, Devlet İstatistik Enstitüsünce (DİE) sonu (o) sıfır ve (5) beş ile biten yıllarda uygulanmaktadır. Genel nüfus sayımı ilk kez 1927'de, İkinci kez 1935'de yapılmış ve bunu izleyen her beş yılda bir yenilenmiştir.

Bu sayımların amacı, sayım günü, ülke sınırları içinde bulunan asker, sivil, yerli ve yabancı nüfusun sayısını; sosyal ve ekonomik nitelikleri yönünden saptamaktır. Sayımda halihazır (de facto) nüfus temel olarak ele alınır. Sayım birimi hane halkıdır.

Türkiye, nüfus artış hızı yüksek olan ülkeler arasındadır. Bu artışda, kaba doğum hızının binde 40 civarında oluşu ve ölüm hızlarında görülen düşme, önemli rol oynamaktadır. Son sayımda belirlenen yıllık artış hızı binde 25'dir. Genel ölümler ve çocuk ölümleri içerisinde bir yaşından önce ölenler (bebek ölümleri) halen ağırlık ve önemini korumaktadır.

Doğurganlık hızının yüksek oluşu, 0-14 yaş grubundaki genç nüfusun toplam nüfus içerisindeki oranını devamlı artırmaktadır. Bu oran 1955 yılında yüzde 39,4 iken 1965'de yüzde 42.0 ve 1975'de yüzde 40 olmuştur.

Nüfusun belirli kentsel merkezlerde yığılması nedeniyle Türkiye'de hızlı bir şehirleşme hareketi görülmektedir. Şehirsel yerleşme birimleri sayısı (nüfusu 10.000'den yukarı) 1960 yılında 148 iken 1970'de 262 ve 1975'de de 290 olmuştur. Şehir nüfusunun toplam nüfusa oranı da 1960 yılında yüzde 32 iken 1970'de yüzde 38 ve 1975'de de yüzde 42'ye çıkmıştır.

### Doğum ve Ölüm İstatistikleri :

Türkiye'de doğum olayları ile ilgili genel bir derleme yapılmamaktadır. 1968'den beri sosyalizasyon hizmeti kapsamındaki illerden derlenen «Doğum Fiş» leri de gerçekleri yansıtmamaktadır.

Ölüm istatistikleri ile ilgili veriler sadece il ve ilçe merkezlerinden, DİE'ce derlenmektedir. Derlemede, belediye ve hükümet tabiplikleri̇nce düzenlenen «Ölü Gömme İzin Kâğıdı» kullanılmaktadır. Bu veriler uluslararası standartlara uygun olarak kodlanmakta ve yayımlanmaktadır. Ölüm verilerinin derlenmesinde de bazı bölgesel aksaklıklar devam etmektedir.

Türkiye Nüfus Araştırması 1966-67 verilerine göre kaba doğum oranı kırsal bölgelerde binde 44, şehirsel bölgelerde binde 31 idi. Aynı araştırmaya göre kaba ölüm oranı da kırsal bölgelerde binde 17, şehirsel bölgelerde binde 11 idi.

## POPULATION

In Turkey, the quinquennial censuses are taken by the State Institute of Statistics (SIS) in years ending with (0) zero and (5) five. The first census conducted in 1927 and the second in 1935 were followed by censuses of population taken regularly every five years.

The aim of the population censuses is to determine precisely the number and social and economic characteristics of military, civilian, domestic and alien population within the boundaries of the country. De facto concept is taken in hand basis. The enumeration unit is the household.

Turkey is among the countries where population increase is higher. In this increase, the crude birth rate being 40 per thousand and a decrease in death rate, plays an important role. The annual increase rate determined in the last census is 2.5 per thousand. Among general death and children's death, those who die before one year of age (infant death), are of much importance at present.

The fertility rate being high, it results in the increase of the rate of young population 0-14 age group continuously within total population. This rate was 39.4 per cent in 1955, 42.0 per cent in 1955, 42.0 per cent in 1965 and 40 per cent in 1975.

Because of the rapid population increase in definite urban centres, a speedy urbanization is recognized in Turkey. The number of urban settlement units where the population is over 10.000, was 148 in 1960, 262 in 1970 and 290 in 1975. The ratio of urban population to general population was 32 per'cent in 1960, 38 per cent ni 1970 and 42 per cent in 1975.

### Birth and Mortality Statistics

In Turkey, a general collecting of birth cases was not been carried out. Since 1968, «Birth Sheet» collecting from socialized provinces are not reflected the reality.

Mortality statistics are collected by SIS from provincial and district centers. In collecting, «Death Certificate» is used. This certificate is completed by government or municipality physicians. Mortality data are coded and published in accordance with the international standarts by SIS. Some regional defects determined in mortality statistics are continued ever since.

According to the Turkish Demographic Survey, 1966-1967; crude birth rate, in the rural areas was 44 per thousand, in the urban areas 31 per thousand. Crude death rate in the rural areas was 17 thousand and in the urban areas 11 per thousand.

Ankara-Etimesgut Eğitim Araştırma Sağlık Grup Başkanlığının 1978 yılı verilerine göre; kaba doğum oranı binde 26.7, doğurganlık hızı binde 113.7, kaba ölüm oranı binde 6, bebek ölüm hızı binde 85'dir. Genel ölümlerin yüzde 43.6'sını 0-4 yaş grubundaki ölümler ve yüzde 46.4'ünü de 45 ve yukarı yaş grubundaki ölümler teşkil etmektedir.

## SAĞLIK İNSAN GÜCÜ

Türkiye'de koruyucu ve tedavi sağlık hizmetlerinde çeşitli meslek mensupları görevli bulunmaktadır. Bu personelin büyük çoğunluğu başta Sağlık ve Sosyal Yardım Bakanlığı olmak üzere diğer kamu ve özel kuruluşlarda görevlidir.

Aralık 1978'e göre, ülkede 25230 hekim, 6826 diş hekimi ve 11280 eczacı vardır. Hekimlerin yüzde 22.4'ü Sağlık Bakanlığında, yüzde 18.2'si Sosyal Güvenlik Bakanlığında, yüzde 24.7'si diğer kamu kuruluşlarında ve yüzde 34.7'si de özel olarak çalışmaktadır.

Hekimlerin yüzde 61.2'si uzmandır. Diğer yönden yurt içi hekim dağılışındaki dengesizlik de devam etmektedir. Örneğin; mevcut hekimlerin yüzde 67.7'si Ankara, İstanbul ve İzmir'de (Ankara % 22.3, İstanbul % 34.7, İzmir % 10.7) bulunmaktadır. Bir hekime düşen nüfus; Ankara'da 520, İstanbul'da 510, İzmir'de 670, Kars'da 8 230, Malatya'da 6 250, Van'da 7 170, Gümüşhane'de 14 220, Hakkâri'de 8 800, Diyarbakır'da 2 740, Aydın'da 3 360, Kütahya'da 2 850, Burdur'da 6 760'dır.

Uzman hekimlerin yüzde 19.6'sı (3025) iç hastalıkları, yüzde 10.9'u (1686) kadın-doğum, yüzde 9.8'i (1517) çocuk hastalıkları, yüzde 7.4' (1142) genel cerrahi, yüzde 4.5 (696) ruh ve sinir hastalıkları, yüzde 47.8'i de (6380) diğer dalları teşkil ediyor.

Diş hekimlerinin yüzde 34.7'si, eczacıların yüzde 30'u kamu kuruluşlarında görevli olup diğerleri özel olarak çalışmaktadır.

Aralık 1978'e göre, ülkede 11 141 sağlık teknisyeni (toplum sağlığı, çevre sağlığı, laboratuvar, röntgen) 20 666 hemşire ve hemşire yardımcısı, 16 219 ebe vardır.

## SAĞLIK PERSONELİ YETİŞTİREN OKULLAR :

Sağlık hizmetlerinde görevli personel, çeşitli kademedeki yüksek ve orta dereceli meslekî okullarda yetişmektedir. Aralık 1978'e göre ülkede; 18 tıp fakültesi, 8 dişçilik ve 8 eczacılık fakülte ve yüksek okulu, 3 yüksek hemşirelik okulu, 1 Sosyal Hizmetler Akademisi (sosyal hizmet uzmanları için), 1 Sağlık Eğitim Enstitüsü (Toplum sağlığı, çevre sağlığı, tıbbi bakım ve ana ve çocuk sağlığı branşlarında yönetici, öğretici ve eğitici personel için) 2 Sağlık İdaresi Yüksek

According to the 1978 data of Ankara-Etimesgut Training and Research Center; crude birth rate was 26.7 per thousand, fertility rate 113.7 per thousand, crude death rate 6 per thousand, infant mortality rate 85 per thousand. Deaths in 0-4 age group covers 43.6 per cent of general deaths and in 45 and over age groups covers 46.4 per cent.

## HEALTH MANPOWER

In Turkey, various professional groups are employed in preventive and curative health services. A great majority of these personnel are charged at the Ministry of Health and the other public and private sectors.

According to December 1978; in the country, there were 25 230 physicians, 6 826 dentists, and 11 280 pharmacists. 22.4 % of physicians were employed at the Ministry of Health, 18.2 % at the Ministry of Social Security, 24.7 % at other public organizations and 34.7 % were practicing privately.

61.2 % of physicians were specialists. On the other hand, unbalanced distribution of physicians all over country is still continuing. For example, 67.7 % of existing physicians were in Ankara, İstanbul and İzmir. (22.3 % in Ankara, 34.7 % in İstanbul and 10.7 % in İzmir) Population per physicians was; 520 in Ankara, 510 in İstanbul, 670 in İzmir, 8 230 in Kars, 6 250 in Malatya, 7 170 in Van, 14 220 in Gümüşhane, 8 800 in Hakkâri, 2 740 in Diyarbakır, 3 360 in Aydın, 2 850 in Kütahya and 6 760 in Burdur.

19.6 % (3025) of specialists were internal medicine, 10.9 % (1686) obstetrics and gynaecology, 9.8 % (1517) paediatrics. 7.4 % (1142) general surgary, 4.5 % (696) psychiatry and 47.8 % (6380) other fields.

34.7 % of dentists and 30 % of pharmacists were employed at the public sector, the others were practicing privately.

In December 1978, in the country, there were also 11 141 health technicians (community health, environmental health, laboratory and X-ray), 20 966 nurses and aux. nurses, and 16 219 midwives.

## HEALTH SCHOOLS

Personnel employed in health services, are trained at various level professional training schools. In December 1978, in the country, there were; 18 medical schools, 8 dentistry and 8 pharmacy schools, 3 higher nursing schools, 1 school for social Workers, 1 Health Education Institute (for the administrator, teacher, educator in the fields of community health, environmental health, medical care and mother and child care) 2 health

Okulu (özellikle hastanelere yönetici personel için), 1 Beslenme-Diyet Yüksek Okulu ve 1 Fizik Tedavi ve Rehabilitasyon Yüksek Okulu, 87 sağlık koleji (80 Hemşire-Ebelik, 3 toplum sağlığı, 2 çevre sağlığı ve 2 laboratuvar ve radyoloji) mevcuttur.

Hekim, diş hekimi ve eczacı yetiştiren okullar haricindeki okulların büyük çoğunluğu Sağlık ve Sosyal Yardım Bakanlığına aittir.

HASTANELER ve ÇALIŞMALARI :

Tedavi edici sağlık hizmetlerini yürütme görevi, 1593 Sayılı Umumi Hıfzıssıhha Kanunu ve 3017 Sayılı Bakanlık Örgüt Kanunu ile Sağlık ve Sosyal Yardım Bakanlığına verilmiştir. Bakanlık, lüzum görülen yerlerde her çeşit hastane açmak, Millî Savunma Bakanlığı (MSB) ve üniversiteler haricindeki diğer kamu ve özel kuruluşlara ait hastanelerin açılış ruhsatını vermek, yatak ücret tarifelerini onaylamak ve bunları denetlemekle yetkilidir.

Hastane İstatistikleri :

Bu istatistikler, Bakanlık Sağlık Propagandası ve Tıbbî İstatistik Genel Müdürlüğünce, Türkiye'deki resmî ve özel tüm hastanelerden derlenmektedir. Bu derlemede 1974 yılı sonuna kadar. Uluslararası Hastalıklar Sınıflaması (UHS) 1955 Revizyonu kullanılmıştır. İleriden beri süren bu uygulama, derlemedeki teknik hatalar ve eğitimsiz personel kullanma nedeniyle hastane çalışmalarını ve hastane hastalık istatistiklerini tam olarak yansıtamamış ve birçok derleme güçlüklerine neden olmuştur.

Bu nedenle, derlemede kullanılan istatistik formları, Dünya Sağlık Örgütünün Uluslararası Hastalıklar Sınıflaması 1965 Revizyonuna ve istatistik metod ve standartlarına göre yeniden düzenlenerek, 1974 yılı içerisinde 48 pilot hastanede denendikten sonra 1975 yılı başında genel uygulamaya başlanmıştır. Gerek yeni formlar ve gerekse 1974 yılı içinde tüm hastanelerde bu işle görevli personelin eğitilmesi, hastane istatistiklerinin güvenilir ve geçerliliğini, geçmişe oranla artırmıştır. Bu yıllıkda, diğer yıllıklara oranla, hastane istatistikleri daha detaylı ve geniş olarak ele alınmıştır.

Yeni uygulamada, genel hastaneler için 150 Başlıklı A Listesi, özel dal hastaneleri için de 999 Başlıklı Genel Listeden seçilerek hazırlanmış özel listeler kullanılmaktadır.

Hastaneler :

1978 yılı içinde, Türkiye'de MSB'na ait 44 hastane dahil, hastane sayısı 820'dir. Hastanelerin (MSB hastaneleri hariç) cinse göre sayısal dağılımı da şöyledir : 397 Genel Hastane, 279 Sağlık Merkezi, 37 Doğumevi, 43 Göğüs, 3 Kemik. 1 Lepra, 1 Kuduz, 3 Trahom, 9 Ruh ve Sinir, 2 Zührevî Hastalıklar, 1 Onkoloji Hastanesi.

administration schools (particularly, for hospital administration), 1 higher school of nutrition and diet, 1 higher school of physical thearphy and rehabilitation, 87 health colleges (80 nursing-midwifery, 3 community health, 2 enviromental health and 2 laboratory and radiology).

A great majority out of the medical, dentistry and pharmacy shools are attached to the Ministry of Health and Social Assistance.

HOSPITALS AND ACTIVITIES :

The duty of carrying out curative health services, has been given to the Ministry of Health and Social Assistance with the Public Health Law No : 1593 and the law for Ministry's Organization No : 3017. The Ministry is assigned with establishing every kind of hospital, permitting for opening hospitals run by other general and specialized institutions at the outside of the Ministry of National Defence and the Universities. Also the Ministry has a right to control, confirm and supervise them.

Hospital Statistics :

Hospital statistics are collected from all public and private hospitals by the Department of Health Education and Medical Statistics of the Ministry. In this collection, up to the end of 1974, 1955 Revision of WHO's International classification of Diseases (ICD) was used. This application caused many collection difficulties of data because of technical errors and untrained personnel

Therefore, statistical forms were newly designed in accordance with the 1965 Revison of ICD, and with statistical methods and standards. After testing of these forms in 48 pilot hospitals and personnel training, general application started at the beginning of the 1975. This new system and personnel training increased the reliability and validity of hospital statistics. In this year-book, hospital statistics in comprasion with the other year-books, have been taken in hand in detail and on a large scale.

In the new application, list of 150 causes (List A) is used for general hospitals, and special diseases lists chosen from the list of 999 causes, are used for specialized hospitals.

Hospitals :

In 1978, in the country, there were 820 hospitals including 44 military hospitals. Number of hospitals (except military hospitals) by branches were : 397 general hospitals, 279 health centers with bed, 37 maternity hospipitals, 43 chest diseases, 3 bone diseases, 1 leprosy 3 trachoma, 9 mental diseases, 2 veneral diseases, 1 oncology hospital

**Yatak Durumu :**

**1978 yılı sonu itibariyle Türkiye'de MSB'na bağlı hastanelerde mevcut 15100 yatakla birlikte; tüm hasatnelerde toplam 101 626 hasta yatağı vardır ve ortalama 425 kişiye bir yatak düşmektedir. 101 626 hasta yatağı, hastanelere verilen kadro yatağı olup, gerçek kullanılan fiili yatak sayısı yaklaşık yüzde 3 bundan düşüktür. Mevcut yatakların (MSB hastaneleri hariç) % 68.1'i genel hastanelerde, % 4.1'i sağlık merkezlerinde, % 12'si göğüs ahstalıkları hastaneleri, % 5.8'i doğumevlerinde ve geri kalan % 10'da diğer özel dal (kemik, lepra, kuduz, trahom) hastanelerindedri.**

**Diğer yönden, bu yatakların; % 62.7'si Sağlık ve Sosyal Yardım Bakanlığına, % 16.3'ü Sosyal Güvenlik Bakanlığına, % 10.3'ü Üniversitelere % 3.2'si belediyelere, % 3.9'u diğer kamu kuruluşların ve % 3.6'sı da azınlık, yabancı ve özel kişilere ait hastanelerde bulunmaktadır.**

**Ayakta Tedavi-Poliklinik :**

**1978 yılında, hastane polikliniklerinde 23 705 845 kişinin muayene ve tedavi yapılmıştır. Bu sayıya, hastanelere birden fazla müracaat edenler de dahildir. Bunların % 44,5'i Sağlık ve Sosyal Yardım Bakanlığı hastanelerinden yararlanmıştır.**

**Yatakta Tedavi :**

**1978 yılında, hastanelerde 1 917 638 hastanın bakım ve tedavisi yapılmış, bunlardan 1 868 752 hasta taburcu olmuş ve 48 886 hasta da ölmüştür. Bakım ve tedavisi yapılan hastaların; % 55.6'sı Sağlık ve Sosyal Yardım Bakanlığına, % 25.6'sı Sosyal Güvenlik Bakanlığına, % 2.5'i belediyelere, % 7.8'i Üniversitelere % 2'si diğer kamu kuruluşlarına ve % 6.5'i de azınlık, yabancı ve özel kişilere ait hastanelere aittir.**

**Yatak İşgal Oranı :**

**1978 yılında, Türkiye hastanelerinde genel ortalama yatak işgal oranı % 54'dür. Bu oran hastanelerin cinslerine göre farklıdır. Örneğin Genel hastanelerde % 50, sağlık merkezlerinde % 14, göğüs hastalıkları hastanelerinde % 62, doğum evlerinde % 69'dur.**

**Yatak işgal oranı, hastanelerin bağlı olduğu kuruluşlara göre de farklıdır. Örneğin : Sağlık Bakanlığı hastanelerinde % 46, Sosyal Güvenlik Bakanlığı hastanelerinde % 91, belediye hastanelerinde % 54, özel hastanelerde % 51'dir.**

**Hesaplamada büyük kentlerdeki 300 ve daha yukarı hasta yatağı olan hastanelere ait işgal oranının, verilen ortalamalara göre yüksek olduğu görülür. Bunda, özellikle uzman hekimlerin yurt içi dağılımındaki dengesizlik ve büyük hastanelerin ve eğitim hastanelerinin büyük kentlerde kurulmuş olmasının etkisi vardır.**

Bed condition :

In the same year, there were 101 626 hospital beds, including 15 100 military hospitals' beds. There was one bed for 425 persons. 101 626 hospital beds was staff beds, the number of existing beds was 3 per cent low. Distribution of hospital beds (except military hospitals' beds) by branches were; 68.1 % in general hospitals, 4.1 % in health centers, 12 % in chest diseases, 5.8 % in maternity hospitals and 10 % in the other hospitals (bone, leprosy, rabies, trachoma).

On the other hand, 62.7 % of the existing beds were in the hospitals of the Ministry of Health, 16.3 % at the Ministry of Social security, 10.3 % at the Universities, 3.2 % at the municipalities, 3.9 % at the other public organizations and 3.6 % at the hospitals of minorities, froigners and private persons.

Out - Patient - Polyclinics :

İn 1978, 23 705 845 patients were examined and treated at hospital policlinics. This figure covers more than one application. 44.5 % of the patients applied to the hospitals of the Ministry of Health.

In-patient :

In 1978, 1 917 638 patients were examined and treated in the hospitals. 1 868 752 of these discharged and 48 886 persons died. Patients accepted by the hospitals of the different organization were: 55.6 % the Ministry of Health, 25.6 % the Ministry of Social Security, 2.5 % municipalities, 7.8 % universities, 2 % other public organizations and 6.5 % the minorities, froigners and private organizations.

Bed Occupancy Rate :

In 1978, the bed occupancy rate in all the hospitals of Turkey was 54 % in general. This rate differs as to the kind of hospitals. For example; 50 % in general hospitals, 14 % in health centres, 62 % in chest diseases hospitals, 69 % in maternity hospitals.

The bed occupancy rate differs by organizations. For example; 46 % in hospitals of the Ministry of Health, 91 % in hospitals of the Ministry of Social security, 54 % in municipal hospitals and 51 % in private hospitals.

In calculation, the bed occupancy rate of the hospitals in large cities having 300 and over hospital beds, is noticed as high according to the averages. Particularly, unbalanced distribution of specialist within the country, large hospitals and also training hospitals being established in big cities, has a special effect in this matter.

**Ortalama Kalış Gün Sayısı :**

**Bir hastanın ortalama kalış gün sayısı, yatak işgal oranında olduğu gibi, hastanelere, hastane cinslerine ve bağlı oldukları kurumlara ve hastalıklara göre değişiklik göstermektedir.**

**1978 yılında, Türkiye hastanelerinde genel ortalama bir hastanın kalış gün sayısı 9 gündür. Bu sayı genel hastanelerde 7 gün, sağlık merkezlerinde 3 gün, doğumevlerinde 3 gündür.**

**Ameliyat :**

**1975 yılında başlanılan uygulamada, ameliyatlarla ilgili yeni bir sınıflamada yapılmıştır. Ameliyat sınıflamasında, ameliyatlar hastane servislerine ve «Büyük, orta, küçük» olarak ele alınmıştır. Bu sınıflamalar, ilgili uzmanlardan oluşan komitelerce de yapılmıştır.**

**1978 yılında, Tüm Türkiye hastanelerinde 136 983 büyük 204 869 orta ve 208 721 küçük olmak üzere 550 573 ameliyat yapılmıştır. Bu ameliyatların % 52.4'ü SSYB'na ait hastanelerde ya pılmıştır.**

**Kaba Ölüm Oranı :**

**Türkiye'deki hastanelerde genel kaba ölüm oranı 1977'de binde 26.1 ve 1978'de binde 25.4 dür. Hastane kayıtlarına geçen ölümlerin bu oranın hesaplanmasındaki kriterlere uygunluğunu bilmiyoruz. Örneğin : Poliklinikde ve ambulans içinde meydana gelen ölümler gibi.**

**Otopsi :**

**Hastanelerde yapılan otopsiler, genellikle adli olaylarla ilgili olmaktadır. Bu konuda bir veri derlenmemekle birlikte, otopsi sayılarının çok düşük olduğu sanılmaktadır.**

**Laboratuvar Çalışmaları :**

**Laboratuvar çalışmaları ile ilgili verilerin derlenmesi yeni uygulamada; hastanelere fazla yüklenilmemesi ve yeni formların personel tarafından benimsenmesi düşünüldüğünden, ele alınmamıştır.**

**Bu türlü laboratuvar tahlil ve incelemeleri, röntgen çekimleri, kan tüketimleri, eletro çekimleri, ilâç tüketimleri, tıbbî araç-gereç durumları gibi önemli verilerin derlenmesi için gerekli ön çalışmalar planlanmaktadır.**

**HASTALIKLARIN KONTROLU ve KORUNMA :**

**Türkiye'de 38 bulaşıcı ve salgın hastalığın bildirimi zorunludur. Tüm sağlık kuruluşları, sağlık personeli, köy, okul ve müessese yöneticileri ve aile reisleri bu hastalıkların ilgili sağlık kuruluşlarına bildiriminden sorumludur.**

Average length of stay (Day)

Average number of days of a patient stay in the hospital, varies according to the hospitals, to kind of hospitals and the organizations to the hospitals, to kind of hospitals and the organizations to which they are attached and to the diseases.

In 1978, general average length of stay in the hospitals of Turkey was 9 days, This number in general hospitals was 7 days, in health centres 3 days and in maternity hospitals 3 days.

Surgical Operations :

In the new application which was started in 1975, a new classification concerned with operations was arranged. In classification concerned with operation, operations were taken in hand according to the hospital services and were classified as big, middle and small. This classification was arranged by committees consisted of concerned specialists.

In 1978, in all the hospitals of Turkey 136 983 big, 204 869 middle and 208 721 small operations were performed. 52.4 % of these operations were performed in the hospitals of the Ministry of Health.

Crude Death Rate :

General crude death rate in the hospitals of Turkey was 26.1 per thousand in 1977 and 25.4 per thousand in 1978. Deaths registered in hospital records, are unknown whether they are in accordance with the criteria in calculating this rate or not. For example : deaths occurred in polyclinics and inside the ambulance.

Autopsy :

Autopsies performed in hospitals, are concerned with legal cases generally. Data is not collected in this respect and the number of post mortem examinations are thought to be very low.

Laboratory Activities :

In the new application, collecting of data concerned with laboratory activities was taken in hand with the consideration that these new forms must be taken up seriously by personnel and not to place a load upon the hospitals.

Preliminary studies needed for every kind of laboratory analysis and researches, x-rays, blood and drug consumption, electro determination, and the conditions of medical means and media including the collecting of important data is planned.

CONTROL AND PREVENTİON OF DISEASES

In Turkey, notification of 38 diseases is compolsory. All health establishments, health personnel, administrators of villages, schools and institutions, and family leaders are obliged to notify these diseases to the related health health establishments.

**Bildirim iletişimi, özellikle sosyalizasyon bölgelerinde belli bir kayıt düzenine sahiptir. Bazı bölgelerde personel noksanlığı, hizmet içi eğitim yetersizliği coğrafi ve iklim koşulları, bildirimlerin zamanında yapılmasını engellemektedir. Bu nedenle bildirilen bulaşıcı hastalık vak'aları beklenen vak'a sayılarından düşüktür. Sıtma, Lepra ve tüberküloz vak'aları bunların haricindedir.**

**Türkiye geçmişte bulaşıcı ve salgın hastalıklara karşı başarılı mücadele vermiştir. Son 20 yıldan bu yana çiçek, epidemik tifüs görülmemektedir.**

**Bulaşıcı ve salgın hastalıklar içinde su ve gıda kaynaklı bağırsak enfeksiyon (tifo, paratifo, dizanteri, enfeksiyöz, hepatit yaz ishalleri vb.) ve enfeksiyonları çevre sağlığı koşullarının bozuk olduğu bazı bölgelerde daha fazla göze çarpmaktadır. Bunlar arasında yaz ishalleri bebek ve çocuk ölümlerinin temel nedeni olmaktadır. Hıfzıssıhha Enstitüleri, bölge ve hastane laboratuvarları, enterobakteri teşhis üniteleri bu tür vak'aların esas teşhis ve bildirim kaynaklarıdır.**

**Bulaşıcı bağırsak enfeksiyonlarına karşı yürütülen; epidemiyolojik sürveyans çalışmaları, aşı uygulamaları, koruyucu ve tedavi edici ilâç dağıtımı, şebeke sularının devamlı klorlanması, suların laboratuvar kontrolu altında tutulması ve halk sağlık eğitimi çalışmaları sayesinde, bu hastalıkların salgın yapma ve yayılma karekterleri engellenmektedir.**

**Aşı ile korunulması mümkün çocukluk dönemi hastalıkları (boğmaca, difteri, tetanos, kızamık, polio ve tbc.) na karşı yürütülen sistematik aşı uygulamaları ileriden beri devam etmektedir. Türkiye, Dünya Sağlık Örgütünün, aşı uygulamaları konusundaki 1990 yılı hedef alan «Yaygınlaştırılmış Aşı Uygulaması» çağrısını olumlu karşılamıştır. Dünya Sağlık Örgütünün, bu konudaki tavsiye ve önerilerine her zaman olduğu gibi uyacaktır. İlk adım olarak, ülke düzeyinde standart aşı kayıt ve izleme sistemi, ulusal aşı üretiminde artış ve gelişme, aşı sevk, depolama, koruma ve tüketim çalışmaları ele alınmış bulunmaktadır.**

**Türkiye, sıtma ve tüberküloz kontrolünde etkili kontrol sistemlerine sahiptir. 1953'den beri düzenli bir şekilde sürdürülen BCG aşı uygulamaları, mikrofilm taramaları, dispanser çalışmaları ve laboratuvar muayeneleri ile tüberküloz vak'aları büyük ölcüde kontrol altına alınmış, yeni yetişen neslin BCG aşılı olması sağlanmıştır. Aşılamada allerji virajı 1978'de yüzde 95.9 ve komplikasyon binde 2.1 oranında bulunmuştur.**

**İl ve ilçe merkezlerinde tüberkülozdan ölüm oranı 1945'den beri düşmektedir. Bu oran, 1945'de yüzbinde 262.1 iken 1965'de 36.5 ve 1976'da 9.95 olmuştur.**

Notification system, particularly in the soclalized provinces has a regular registration system. The number of cases notified is, in fact, less than actual number of cases. There are some reasons, for this matter, such as; lack of personnel, lack of knowledge in people who are responsible for notifying infectious diseases but who do not take this duty seriously, transportation problems, lack of in-service training and geographical and climatic conditions. Malaria, leprosy and tuberculosis cases are out of this matter.

In the past, Turkey had suscesful on the control of epidemic and infectious diseases. Last 20 years, smallpox and epidemic tyhpus have not been notified.

Among comminicable and epidemic diseases, food-borne and waterborne intestinal diseases are seen more frequently in areas where sanitation is poor. Usually enteritis and diarrhoel cases constitute the main reason of infant and child mortality. The diagnosis and notification sources of these diseases are the Hygiene Institutions, regional and hospital laboratories and Entero-Bacterial Diagnosis Units.

Effective Control and prevention activities against these diseases have been taken through epidemiological surveillance, immunization activities, distrubition of preventive and curative drugs, continual labarotory control and chlorination of water and public health education.

In Turkey vaccination programmes against six target diseases of WHO (diphtheria, pertusis, tetanus, measles, poliomyelitis, tuberculosis) have been in action since a long time. Turkey is in agreement with the call of WHO for «Expanded Immunization Programme» to be attained by 1990. For this aime as a first step, registration and monitoring immunization activities all over the country, increase in the development and national production of vaccines and sera, studies in storing, transportat on, protection and comsumption of vaccines have been taken seriously.

Turkey has an effective tuberculosis and malaria control system. Since 1953 BCG immunization programs have been regularly applied. A great majority of the tbc. cases are under control through effective activities of the dispansaries, laboratory exams and micro-film screening. In the years of 1953-1978, boosters included, 39.2 million BCG vaccinations have been applied. Thus we have been to create a generation that has been fully immunized against tuberculosis. In BCG immunizations effectiveness of the program after vaccination and control was 95.9 % and general complications were 2.1 % 0.

In the centers of provinces and districts, tuberculosis mortality rate has been decreasing since 1945. This rate per 100.000 pop. was 262.1 in 1945, 36.5 in 1965 and 9.95 in 1976.

Son 20 yılda yapılan başarılı çalışmalarla sıtma insidansında, takdir edilir düşme görülmüştür. 1975 yılına kadar ülkenin yüzde 95 bölgesinde sıtma intikali durdurulmuştu. Maalesef, 1976 yılında Çukurova bölgesinde bir epidemi görüldü. Bu epideminin temel nedenleri, bölgede geniş ve yaygın sulama kanallarının bulunması, intektisite karşı resistans ve bölgenin uygun iklime sahip oluşudur. 1975 yılında yüzbinde 25.1 olan sıtma insidansı, epidemi sonucu 1976'da 91.5, 1977'de 277.6 olmuştur. 1978'de yüzbinde 204.4'e düşmüştür.

Trahom, ülkenin özellikle güney-doğu bölgesinde mevcuttur. Altyapı noksanlığı, sosyo-ekonomik güçlükler, trahomun eradike edilmesini engellemektedir. Yapılan muayenelerde 1945'de yüzde 46.7 olan trahomlu oranı, 1965'de yüzde 9.2 ve 1978'de yüzde 1.5 olmuştur.

Frengi ve lepra, kayıt ve kontrol sistemi düzenlidir. 1935'de yüzbinde 1 154 olan frengi prevelansı 1965'de 89.2 ve 1978'de 25.5 olmuştur. Aynı yıllardaki frengi insidansı da yüzbinde 127, 2.2 ve 2.3 idi.

Lepra kontrol çalışmaları özellikle 1960'dan sonra önem kazanmıştır. 1965 yılında yüzbinde 1.4 olan lepra insidansı 1978'de 0.1 olmuştur.

Türkiye'deki bulaşıcı hastalıkların kontrol çalışmalarına teknik ve malî yönden Dünya Sağlık Örgütü ve UNICEF'in büyük katkıları olmuştur. Burada, bu hususu şükranla belirtmek isteriz.

ÇEVRE SAĞLIĞI :

Türkiye çok yönlü çevre sağlığı sorunlarına sahip bir ülkedir. Hızlı nüfus artışı, düzensiz şehirleşme ve sanayileşme, eğitim noksanlığı bu sorunları yoğunlaştırmaktadır. Bu sorunların çözümlenmesinde başta Sağlık Bakanlığı olmak üzere birçok kamu kuruluşları ve yerel kuruluşların sorumluluğu vardır.

Bugün Türkiye'de ileri toplumlarda rastlanan çevre kirliliği görülmemekle birlikte, yaygın olan geleneksel kesimdeki su, kanalizasyon sorunu, gecekondu bölgelerinde kötü barınma koşulları, toprak ve orman erozyonudur. Kara kaynaklı sular, yetersiz altyapı tesisleri atıkları ve arıtılmamış sanayi artıkları ile kirlenmektedir. Deniz kirlenmesi de buna eklenebilir. Hava kirliliği yaygın bir sorun değildir. 7 il'de yerleşim sonucu, 6 il'de sanayi sonucu hava kirliliği mevcuttur. Toprak kirlenmesi, sanayi ve tarımsal ilâçlamadan kaynaklanmaktadır.

Sorunun önemi nedeniyle 1978 yılında Başbakanlık bünyesinde bir Çevre Sağlığı Müsteşarlığı kuruldu. Müsteşarlığın amacı, çevre sağlığı sorunlarının belirlenmesinde ve çözümlenmesinde sektörlerarası gerekli koordinasyonu sağlamaktır. Türkiye Bilimsel ve Teknik Araştırma Kurulu ve Bakanlık Hıfzıssıhha Okulu yaptığı çeşitli araştırma ve çalışmalarla bu konuda yardımcı olmaktır.

As a result of the efforts made during the past 20 years there has been an appreciable fall in the incidence of malarla. Up to 1975, 95 % of the country was in the consolidation phase. Unfortunately, in 1976 Turkey had a malaria epidemics in the Çukurova region.

The main reasons of this epidemics were the resistance against insecticides, presence of large network of irrigation canals and agreable climate for mosquitos. Malaria incidence rates per 100.000 population were 25.1 in 1975, 91.5 in 1976, 277.6 in 1977 and 204.4 in 1978.

Trachoma cases have been noted in the southeast part to Turkey. Because of socio-economic difficulties the eradication of trachoma connot be realized. The trachoma percentage in the examined people was 46.7 in 1945. This figure became 9.2 in 1965 and 1.5 in 1978

The registration and control of syphilis and leprosy is done regularly. The Syphilis prevelance rates per/100.000 were 1154 in 1935, 89.2 in 1965 and 25.5 in 1978. İncidance rates per/100.000 in the same years were 127, 2.2 and 2.3 respectively.

Effective leprosy control activities have been started in 1960. The leprosy incidance rate which was 1.4 per 100.000 in 1965 fell down to 0.1 in 1978.

WHO and UNICEF play very important roles technically and financially in control activities of communicable and epidemic diseases in Turkey.

ENVİRONMENTAL HEALTH

Turkey has various environmental health problems which are on the rise because of rapid population increase, improper urbanization and industrialization and lack of education. Various public and local organizations, but chiefly the Ministry of Health is responsible for the control and resolution of the related problems.

At present environmental pollution of Turkey does not resemble the pollution of the Western Countries, More common causes are water and canalization problems, unhealthty living conditions in slums and erosion of soil and forests. Airpollution is not spread out. 7 provinces have air pollution because of improper settlement and 6 provinces have air pollution because of industry. The origin of soil pollution is industrial and agricultural insecticides.

In 1978 an Under-Secretariat of State for Environmental Health was set up under one of the Ministries of State. The aim of this organizations is to provide co-ordination among various public and private sectors in order to define and solve environmental health problems.

Sağlık Bakanlığı, kendi kontrol sorumluluğundaki çevre sağlığı hizmetlerini yerine getirmek amaciyle, merkez ve iller örgütünde birer çevre sağlığı üniteleri kurmuştur. Bu ünitelere teknik personel sağlayan 2 çevre sağlığı koleji ile yüksek öğrenim veren bir okulun bölümü vardır.

SOSYAL HİZMETLER :

Çağımızda «Refah Devleti» anlayışının bir gereği olarak, toplumun himaye ve bakıma muhtaç kesimlerine gerekli sosyal hizmetin götürülmesi, Devletin aslî görevleri içine girmiş bulunmaktadır. Bu nedenle 1961 Anayasamızın getirmiş olduğu sosyal hizmetlerle ilgili belirgin hükümler, Devletimize «Sosyal Devlet» olma niteliğini kazandırmıştır.

Çeşitli yasalarla Sağlık ve Sosyal Yardım Bakanlığına verilen bu görev, Sosyal Hizmetler Genel Müdürlüğü tarafından yürütülmektedir. Genel Müdürlükçe, korunmaya muhtaç 0-6 yaş grubundaki çocukların bakımı, geri zekâlı çocukların bakımı, himaye ve bakıma muhtaç yaşlıların bakımı sosyal yardım ve sosyal güvenlik hizmetleri, tıbbî - sosyal yardım ve rehabilitasyon hizmetleri yapılmakta ve konu ile ilgili eğitim, araştırma ve tanıtma faaliyetleri sürdürülmektedir.

1978 yılında ülkede 97 Çocuk Bakım Yurdu, 35 Yaşlı Huzurevi, 3 Rehabilitasyon Merkezi hizmetlerini sürdürmüşlerdir.

ANA ve ÇOCUK SAĞLIĞI (AÇS) HİZMETLERİ :

AÇS hizmetleri, Bakanlığın en önemli temel, öncelik ve devamlılık arzeden bir hizmetidir. Ana ve Çocuk Sağlığı Müdürlüğünce yürütülen hizmette şu görevler esas alınmaktadır.

a) Anne namzetlerini, gebelik, doğum ve doğum sonrası, analık hijyeni, düşüklerin önlenlenmesi, çocuk bakımı, beslenmesi, yetiştirilmesi ve aile planlaması konularında eğitmek ve yetiştirmek.

b) Gebeleri tıbbî kontrol altında bulundurmak, doğumlarını normal hijyenik koşullar altında yaptırmak.

c) Doğum sonrası anne ve çocuğun sağlığını kontrol altına almak ve aşılarını yaptırmak.

d) 0-6 yaş grubundaki çocukların gerekli fizik ve moral gelişmelerini izlemek, tıbbî kontrollerini yapmak, özellikle bakım ve beslenme konusunda anne ve aileye yardımcı olmak.

The Ministry of Health has set up necessary units in the central and peripheric organizations. It has 2 health colleges and one higher professional school which provide necessary personnel to these units.

SOCIAL SERVICES

What is intended by «State Welfare» in modern time is the providing of necessary social assistance for the sections of the community that are in need of protection and care. This has been included within the fundamental duties of the State. Owing to this, prominent rules concerned with social services brought forth by our Constitution, helped our state in gaining the characteristics of a «Social State».

This duty given to the Ministry of Health and Social Assistance with several laws, is carried out by the Department of Social Services. Activities concerning care of 0-6 age group children in need of protection, of children having mental retardation and of the aged in need of protection and care, social assistance and social security services, medical-social contribution and rehabilitation services, training and research activities are carried out by this department.

In 1978, attached to this department 97 Care Homes of Children, 35 rest homes for the aged, 3 rehabilitation centres carried out their services.

MATERNAL AND CHILD HEALTH SERVICES

Maternal and Child health services are the most important basic services of the Ministry of Heath by which priority and continuity has been presented. The below-mentioned duties are accepted as basic in services carried out by the Department of Maternal and Child Health.

a) To train and educate up of the women who are expected to be mothers on subjects of pregnancy, maternal hygiene concerning antepartum and post-partum, prevention of abortions, child care and feeding and their growing-up and also on subjects of population planning.

b) To keep mothers under medical control, to secure their deliveries to be undertaken under normal and hygienic circumstances.

c) To take necessary steps at post-partum for the protection of mother and child and apply vaccines to children.

d) To follow the physical and moral development of children in the 0-6 age groups, to secure their medical check-up and to assist the family and the mother especially on care and nutrition.

**AÇS Merkez, Şube ve köy istasyonları, köy grup ebelikleri, sağlık ocakları ve sağlık evlerinin temel hizmetlerini AÇS hizmetlerini kapsamaktadır.**

**AİLE PLANLAMASI :**

**Türkiye doğurganlık oranı yüksek olan bir ülkedir. Devletin, Cumhuriyetin ilk yıllarında kabul etmiş olduğu nüfusun artırılmasını teşvik politikası her ne kadar bunu etkilemişse de ekonomik, sosyal ve kültürel nedenler bu oranın yüksek olmasına neden olmuştur.**

**Doğurganlık oranının yüksek oluşu ve ölüm oranlarının düşmesi, nüfusun hızlı bir düzeyde artmasına neden olmaktadır. Artan nüfusun gerek aile ve gerekse toplum üzerine olan baskısı özellikle ana sağlığını menfi olarak etkilemekte ve istenmeyen gebeliklerden kurtulmak amacı ile birçok ananın sıhhî ve yasal olmayan yollara başvurması sonucu, hayatlarını kaybetmesine, sakat kalmasına ve başka hastalıklara yakalanmasına neden olmaktadır.**

**Bakanlık bu amaçla, belirli sayıdan çok çocuk sahibi olmak istemeyen fakat bilgisizlik ve olanaksızlık nedeniyle bunu sağlıyamıyanlara gebeliği önleyici gerekli bilgi vermekte, ilâç ve araç yardımı yapmaktadır.**

**Nüfus Planlaması Genel Müdürlüğünce yürütülen hizmetin ana ve çocuk sağlığı hizmetleri ile birlikte yürütülmesi için 12 ilde pilot bölge çalışmaları yapılmaktadır.**

**SAĞLIK EĞİTİM, YAYIN ve SAĞLIK İSTATİSTİKLERİ :**

**Bu hizmetler, Bakanlık Sağlık Propagandası ve Tıbbî İstatistik Genel Müdürlüğünce yerine getirilmektedir.**

**a) Sağlık Eğitimi :**

**Sağlık eğitimi hizmetleri; halkın ruh ve beden sağlığının korunması ve sağlık seviyesinin yükseltilmesi amacıyle, yurt çapında, sağlık eğitimi çalışmalarını organize etmek, bu konuda gerekli plan ve programları yapmak, resmî ve özel kuruluşlarla işbirliğini temin etmek, halk sağlığı eğitiminde kullanılmak üzere kitap, broşür, afiş, slayt, film vs. gibi eğitim malzemesi hazırlamak veya temin etmek, sağlık sergileri düzenlemek, gezici ekipler ve taşra örgütündeki personel vasıtası ile fert, grup ve toplum eğitimi çalışmalarını kapsamaktadır.**

**Merkezde iki şube ve illerde Sağlık Müdürlükleri bünyelerinde kurulmuş bulunan Sağlık Eğitimi Şubelerince hizmet yürütülmektedir. Ayrıca 12 İl'de Sağlık Müzesi vardır. İllerde bulunan şu-**

Basic activities of the MCH centers, sections, village stations, village group midwiferies, health centres and health houses are the MCH services.

FAMILY PLANNING

Turkey is a country where the fertility rate is high. Although the encouragement policy accepted by State during the first years of the Republic in increasing population had effect on this; the economical, social and cultural reasons resulted in rate increase.

The fertility rate being high and death rates being low, is the reason for increase of population on a speedy level. The pressure of increasing population both on family and community, effects especially maternal health negatively and causes death of many mothers, let them become disabled and fall sick from other diseases because of avoiding pregnancy by attempting to draw advantage from non-hygienic and non-legal methods.

With this aim the Ministry provides information of contraceptives for those who want children not more than the desired number but cannot secure this information because of ignorence and impossibilities and contribute in securing medicine and means.

In order to entegrate the MCH services with family planning services, the pilot project activities have been undertaking in 12 provinces.

HEALTH EDUCATİON, PUBLICATIONS AND HEALTH STATISTICS

Services concerning these subjects are carried out by the Department of Health Education and Medical Statistics.

a. Health Education

In health education activities cover to protect people's mental and physical health, to organize health education activities throughout the country with the aim of raising the standard of health, to design necessary plans and programmes on this subject, to secure cooperatin with other official and private organizations, to prepare and provide educational material such as books, pamphletes, posters, slides and films, to arrange health exhibitions and to organize individual, group and public education activities through travelling teams and personnel serving in provincial organizations.

The services are carried on by the two offices at the Centre and Health Education Sections in provinces. Besides,there are health museums in 12 provinces. Sections and museums

beler ve müzeler, bütçe olanakları çerçevesinde sağlanan çeşitli eğitim araç ve gereçleri ile donatılmıştır.

b) Yayın :

Bakanlığın yayın organı olan Sağlık Dergisi ve Haberler Bülteni belli bir düzen içerisinde yayımlanmaktadır. Bakanlıkça satın alınacak yayınlar ile yayınlanacak telif ve tercüme eserlerin uygunluğu «Yayınları Tetkik Kurulu» nca incelenmektedir. Yayınla ilgili Bakanlık Yayın Deposu, Kütüphanesi ve Matbaası da Genel Müdürlüğün sorumluluğu altındadır.

c) Sağlık İstatistikleri :

Türkiye'deki tüm resmî ve özel sağlık kurum ve kuruluşlarından sağlık istatistiklerinin derlenmesi, yayınlanması ve bu alandaki çalışmaların geliştirilmesi ve gerekli organizasyonun kurulması çalışmalarını kapsamaktadır. Merkezde bir şube ve İllerdeki Sağlık Müdürlükleri bünyelerindeki Sağlık İstatistikleri Şubelerince hizmet yürütülmektedir.

Sağlık istatistiklerinin geliştirilmesi için ileriden beri çalışmalar sürdürülmektedir. Son olarak, Dünya Sağlık Örgütünün tavsiye ve standartlarına paralel olarak hazırlanan yataklı tedavi kurumları istatistik formları 1975 yılı başında uygulamaya başlanılmıştır.

Bu hizmetlerden ayrı olarak, ülkemizde yapılacak tıp konularında, ulusal ve uluslararası seviyedeki kongre, konferans, seminer ve benzeri toplantılar ile ilgili işlemler de Genel Müdürlükçe yürütülmektedir.

ECZACILIK ve TIBBÎ MÜSTAHZARLAR :

Anılan hizmetler, Bakanlık bünyesindeki Eczacılık ve Tıbbî Müstahzarlar Genel Müdürlüğünce yürütülmektedir. Genel Müdürlükçe, İlâçlara ruhsat verme, fiyatlarını saptama ve kontrolünü yapma, ilâç imal eden yerler ile ecza depoları, eczaneler ve ecza dolaplarının açılması, uyuşturucu ve zehirli maddelerin ithali, ihracı ve yurt içi dağıtımı, kontrolü ve kaçak olarak yakalanan uyuşturucu maddelerin imhası işlemleri yürütülmektedir.

DONATIM :

Donatım hizmetleri şu görevleri kapsamaktadır.

a) Bakanlığa bağlı merkez ve taşra kuruluşlarının, merkezden temin edilebilecek alet, cihaz, ilâç vs. gibi her çeşit ihtiyaç maddelerinin Bakanlığının diğer ilgili dairelerinin hazırlayacakları standartlara göre teminini planlamak ve alım işlerini yapmak, Sağlık kurum ve kuruluşlarının

in provinces, have been eguipped with various means and material secured within the framework of budgetary possiblities.

b. Publications :

Medical journal and Nevs Bulletin which are publications of the Ministry are published at definite times. Publications which will be purchased by the Ministry and the conformity of written and translated works are brought to the investigation of the «Committee for Investigation of Publications». The publications'store - house, the library and the printing - office of the Ministry are also under the responsibility of this Department.

c. Health Statistics :

In Turkey, collecting of health statistics from all formal and private health organizations and establishments, their publication, development of works in this field and setting up the necessary organization are included in the activities concerned with these statistics. The services are carried out by one office at the Centre and Health Statistics Sections in provinces.

Studies are carried out formerly for the development of health statistics. The statistical forms of hospitals prepared in conformity with the reconmendation and standards of the world Health Organization have been applied at the beginning of the year 1975.

Apart from these services, affairs concerned with congresses at national and interinational level, conferences, seminars and similar meetings are carried out by this Department.

PHARMACY and PHARMACEUTICAL PRODUCTS :

Services concerned with pharmaceutics and medical preparations are carried out by the Department of Pharmacy and Pharmaceutical Products at the Ministry. The duties carried out by the Department are : To have all native and foreign preparations registered with the Department, to fix their prices and control them, to obtain permit for the opening of drug manufacturing factories, drug stores and drug cabinets, to import and export narcotics and poisonous material and their distribution with in the country to control the quality of such chemicals and to destroy the smuggled narcotics.

EQUIPMENT SUPPLIES :

The services concerning equipment supplies comprise the below mentioned duties :

a. To plan for supplying and purchasing of every kind of necessary items such as equipments, apparatus and drugs which all central and provincial health organization and establishments of the Ministry will obtain from the centre in accordance with the standards prepared by the other concerned departments of the Ministry; to

**her çeşit ikmal maddelerini uygun bir depolama ve sevk sistemi ile düzenli olarak hizmet yerine ulaştırmak;**

**b) Sağlık kuruluşlarındaki her türlü araç, gereç ve tıbbî malzemenin tamir ve bakımını sağlamak;**

**c) Bakanlığın ayniyat işlerini yürürlükteki mevzuata göre düzenlemek ve kontrolünü yapmak.**

**Donatım Genel Müdürlüğü taşra kuruluşları; Ankara, İstanbul, İzmir, Adana, Diyarbakır ve Erzurum Bölge Depo ve Tamirhane Müdürlükleri, 13 İl'de Bölge Tamirhanesi,**

**SAĞLIK ALANINDA ULUSLARARASI İLİŞKİLER :**

**Sağlık ve Sosyal Yardım Bakanlığı ile Bakanlığa bağlı kuruluşların Birleşmiş Milletler ve bağlı kuruluşları ile uluslararası kuruluşlar ve hükümetlerarası ilişki ve işlemlerin düzenlenmesi ve koordine bir şekilde yürütülmesi Bakanlık bünyesindeki Dış Münasebetler Dairesi Başkanlığı tarafından sağlanmaktadır.**

**Birleşmiş Milletler Kalkınma Örgütü (UNDP - PNUD), Dünya Gıda Programı (WEP) - Çocuk Yardım Fonu (UNICEF), Dünya Sağlık Örgütü (OMS - WHO), Gıda ve Tarım Örgütü (FAO) ve Uluslararası Uyuşturucu Maddeler Kontrol Organı (INCB) çeşitli konularda işbirliği yaptığımız Birleşmiş Milletlere bağlı başlıca kuruluşlardır.**

**İşbirliği yaptığımız uluslararası kuruluşların başlıcaları ise; Merkezî Antlaşma Örgütü (CENTO), Kalkınma için Bölgesel İşbirliği Örgütü (RCD) Avrupa Konseyi (CE), Milletlerarası Çocuk Merkezi (SIE) ve Kuzey Atlantik Andlaşması Örgütü (NATO) Tıp Komitesidir.**

**Bu kuruluşlardan ayrı olarak iki taraflı teknik işbirliği çerçevesi dahilinde; Amerikan Uluslararası Kalkınma Örgütü (US/AID), Amerikan Yardım Örgütü (CARE), Amerikan Nüfus Konseyi (US/PC) gibi kuruluşlar ve bazı ülkelerle de çeşitli sağlık konularında ilişkiler kurulmakta ve işbirliği yapılmaktadır.**

**HIFZISSIHHA OKULU :**

**Halk sağlığının çeşitli dallarında, hizmetiçi eğitimini hedef alan, kısa ve uzun süreli kurslar organize etmek ve araştırmalar yapmak amaciyle görevlendirilen Hıfzıssıhha Okulu, 1975-1978 yılların da çalışmalarını sürdürmüştür,**

send regularly by a convenient storing and transporting system of every kind of materials to the place of service.

b. To secure the repairing and upkeeping of every kind of means, material and medical necessaries in health associations.

c. To arrange and control the affairs concerning goods of the Ministry of Health in accordance with the fundamental subjects of the law in force.

Provincal organizations of the services carried out by the Department of Equipment Supplies are these : Directorate of regional storehouses and repair shops in Ankara, İstanbul, İzmir, Adana, Diyarbakır and in Erzurum, regional repair shops in 13 provinces.

INTERNATIONAL RELATIONS IN HEALTH FIELD :

The arrangement and coordination of relation and transaction between the Ministry of He alth and Social Assistance and organizations attached to the Ministry. United Nations and organizations attached to U. N. International Foundations and also inter-governmental relations secured by the Department of External Relations at the Ministry,

United Nations Development Programme (UNDP-PNUD), The World Food Programme (NEP), United Nations International Children's Emergency Fund (UNICEF), World Health Organization (WHO), The Food and Agriculture Organization (FAO), The International Narcotics Control. Bureau (I NCB) are the main organizations attached to United Nations which we cooperate with on various subjects.

The main International organizations which we cooperate with are the Central Treaty Organization, (CENTO) Regional Cooperation for Development (RCD) International Children's Centre (CIE) and The Medical Committee of the North Atlantic Treaty Organization (NATO).

Besides the above organizations, relations, are established and cooperation is secured under mutual technical aid agreements with organizations such as United States/Aid for International Development (US/AID), Cooperative for American Relief Everywhere (CARE), United States Population Council (US/PC), and with some countries relations are established on health subjects and cooperation is secured.

THE SCHOOL OF PUBLIC HEALTH :

The School of Public Health charged with aim of arranging short and long-term courses aiming in-service training on various branches of health and undertaking researches. The school carried out its activities even in 1975 - 1978.

Dünya Sağlık Örgütü ve Birleşmiş Milletler Kalkınma Örgütü ile Hıfzıssıhha Okulunca birlikte yürütülen «Sağlık Alanında İnsan Gücünün Geliştirilmesi Projesi» nin uygulanmasına 1975'de başlanılmıştır. Proje Uygulamaları çerçevesinde Ankara - Çubuk, İzmir - Torbalı, Trabzon - Sürmene ve Yozgat İlin'de pilot çalışmalar ele alınmıştır. 1978 yılında, Alman Hükümeti ile işbirliği çerçevesinde Tıbbı Eğitim Teknolojisi Merkezi Kurulmuş ve çalışmalarına başlamıştır.

Ayrıca su, hava ve endüstri hijyeni konularında metod araştırmaları yapılmaktadır.

**SAĞLIK HİZMETLERİNİN SOSYALLEŞTİRİLMESİ :**

1961 yılında çıkarılan 224 sayılı «Sağlık Hizmetlerinin Sosyalleştirilmesi Hakkında Kanun» ile sağlık hizmetlerimizin yürütülmesinde yeni bir yöntem ve uygulama getirilmiştir. Yeni hizmet özellikle kırsal alandaki vatandaşımızın sağlık hizmetlerinden yeterince ve dengeli bir şekilde faydalanmasını esas almaktadır.

1963 yılında Muş ilinde başlanılan uygulama 1964'de 5 il ve bir eğitim araştırma merkezi, 1965'de 6 ili, 1967'de 5 il ve bir eğitim araştırma merkezi, 1968'de 5 il ve 1 eğitim - araştırma merkezi, 1969'da 1 il, 1970'de 1 il, 1975'de 1 il ve 1 eğitim araştırma merkezi, 1976'da 6 il, 1977'de 4 il ve 1 eğitim - araştırma merkezi, 1978'de de 4 il olmak üzere toplam 40 il ve 5 eğitim-araştırma merkezini kapsamıştır.

Sosyalizasyon kapsamındaki illerde temel hizmet birimleri sağlık ocakları ve sağlık evleridir. Sağlık ocakları; 7-10 bin nüfus için kurulmuş olup bir hekimin yönetiminde yeteri kadar sağlık teknisyeni, hemşire ve ebe bulunur. Sağlık evleri; 2500-3000 nüfus için kurulmuş olup hizmetin uç ünitesidir. Bir köy ebesince yönetilir.

Sağlık ocakları ve sağlık evleri temel sağlık hizmetlerini yerine getirmekle yükümlüdür. Bunlar; bulaşıcı ve salgın hastalıkların kontrolü, aşılama, aile planlamasının da dahil olduğu ana ve çocuk sağlığı hizmetleri, çevre sağlığı, halk sağlığı eğitimi ve tıbbî kayıt hizmetleridir.

Bu hizmetler yanında, hasta muayene ve tedavisi, müdahaleli doğum, küçük cerrahî müdahaleler, adlî otopsiler, evlenme muayeneleri ve gerekli ilk ve acil yardım gibi tedavi edici hizmetler de bu kuruluşlarda görevli personel tarafından yerine getirilmekte, ağır vak'alar hastanelere sevk edilmektedir.

The implementation of the «Project on Development of Manpower in Health Fied» carried out by the World Health Organization and United Nations' Agency for International Development together with the School of Public Health began on 1975. Pilot studies are handled in provinces Ankara - Çubuk, İzmir - Torbalı, Trabzon Sürmene and Yozgat within the framework of implementation of projects. In 1978 Center of Medical Technology was set up with the cooperation of German Government, and started its activities.

In addition, on subjects of water, air and industry hygiene, method researches are undertaken.

SOCIALIZATION OF HEALTH SERVICES :

With the «Law For the Socialization of Health Services» numbered 224 enacted in 1961, a new method and implementation in carrying out health services has been accepted. As a basic new service, will make it possible for the citiziens in rural areas to have an equal chance of drawing benefit sufficiently from every kind of health services.

The implementation of socialized health services was started in Muş province in 1963 and covered 5 provinces and 1 training and research center in 1964, 6 provinces in 1965, 5 provinces and 1 training and research center in 1967, 5 provinces and 1 training and research center in 1968, 2 provinces in 1969, 1 province in 1970, 1 province and 1 training and research center in 1975, 6 provinces in 1976, 4 provinces and 1 training and research center in 1977, and 4 provinces in 1978, In total this covers 40 provinces and 5 training and research centers.

In the provinces of the socialized health services basic health units are health centers and health houses. Health Centers cover 7 - 10 thousand population and has a health team under the administration of a physician and there are sufficient number of health technicians, nurses and midwives. Health houses covers 2500 - 3000 population. They are the sup - units of health centers with only one midwife serving.

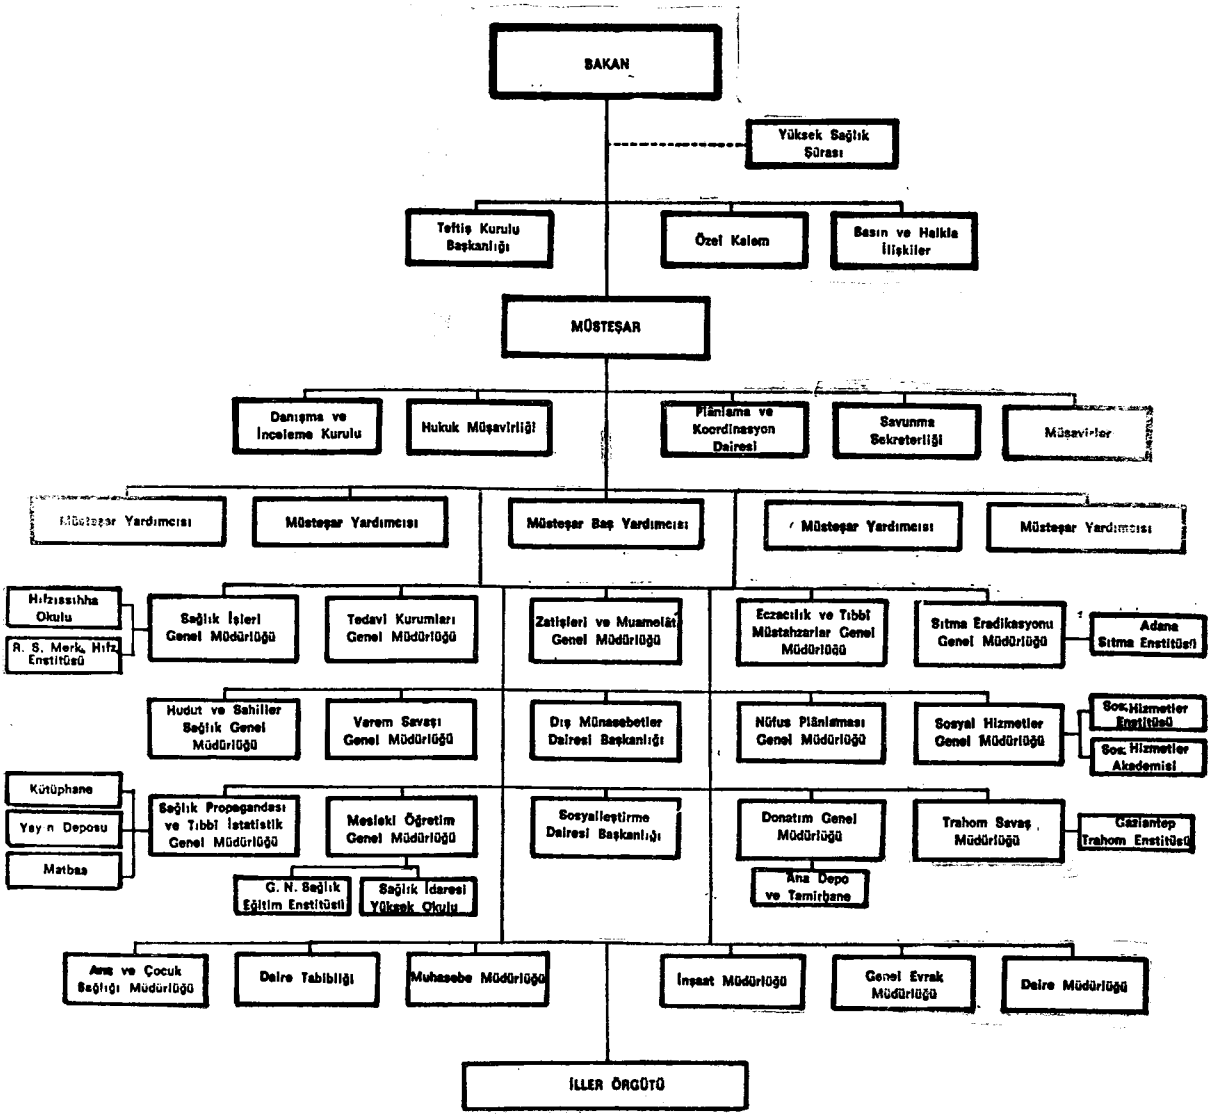

The main duties of the health centers and and health houses are: MCH services including family planning, control, prevention and treatment of comminicable and epidemic diseases, vaccination, environmental health, health education and health registration.

Basides these preventive services, curative services such as patient's examination and treatment, delivery with intervention, small surgical interventions and necessary first aid and emergency service is undertaken by the personnel who are on duty in these foundations and serious cases are sent to hospitals.
